ABOUT US

GREAT BALL CO., LTD

We are a Taiwan-based manufacturer specializing in ODM, OEM, licensed, and exclusive foam products. Our foam materials are non-toxic and safe, free from Ammonia, Cadmium, Formaldehyde, Phthalates, Formamide, and other harmful substances, fully compliant with REACH and PHA standards.

From children's educational toys to senior cognitive and rehabilitation toys, we focus on safety, functionality, and thoughtful design. We believe quality foam products can grow with children and care for every generation.

We are committed to responsible manufacturing and sustainable thinking. By using safe, non-toxic foam materials and reducing unnecessary waste in our production process, we aim to create products that are kind to people and the planet. We believe caring for future generations starts with protecting the environment they will grow up in.
